Printing Plates

The printing plate is a metal or plastic plate, in which the image is engraved. Depending on the application, you can choose nylon, thin steel or thick steel plates

AMTEC offers precision tooled steel plates for high volume pad printing production. Steel Cliches are desirable in printing operation where contaminants or environmental concerns may lead to excessive wear of photopolymer materials. Our exclusive gold etch process yields finer edge definition resulting in superior printing clarity.

Features:

- Standard sizes readily available
- Exclusive gold etch processing
- Precision manufacturing tolerances
- Ceraseal flatness for closed cup printing
- Extended life steel
- Available in five thicknesses (8mm, 10mm, 3/8", 1/4", .015" thin steel)
